

New Account

Since I have opened up the knowledgebase to general internet access, I figured I would document how to create an account. Not a lot to it, just go to <https://join.matt-cloud.com/> and follow the prompts. I get a text message when new accounts are created, so if I know you I may just add you to most Matt-Cloud services when I get a chance. If I don't know you, expect an email.

Revision #1
