

# Intro

I thought I'd make a general overview of some of my stuff here too for the curious. I think I have things secured adequately to describe how things are configured. I have copied over some of my config files for some of the service with sensitive info removed. If anyone has any requests for a howto gimme an email.

There is a lot of stuff that hasn't been true since moving to Joe's, I just forgot about updating this, whoopsie-doodle. I'll work on this later cause it's currently bedtime.
